Forecast for Tuesday 10 Nov 2020

Weather: There will be largely clear skies across the north of the region through the first part of the morning but with some mist or fog patches in valleys. To the south there will be low cloud giving the odd spot of drizzle, along with mist and fog that will be slow to clear. This low cloud will spread north through the morning and lingering throughout the day.

Chance of cloud free mountain/hill tops above 800m: High at first in the north but soon becoming low or very low across the region.

Visibility: Good at first in the north away from valley fog but generally poor across the region.
